

The Dream City Bag *R.I.P bag*
design Sibylle Stöckli, Lausanne, 30 – 03 – 2009
for MondayJazz by louise blanche

Because you don't know what's gonna happend during your day... this unisex bag is made for you. Small and precious, huge and decontracted this bag take the shape of what is inside.

R.I.P

This bag refers to the iconic plastic bag but is made of a noble and resistant material. Here, the proposal is to use a Polyurethane & Polyester fabric named Loop by Kvadrat. a bit like a false leather but 60° washable. But there is other fabric very suitable... let's find it depending also of the budget.

Version 1

two bags, one in a noble and resistant material, the other, in a small pocket, is in very light fabric, like parachute. Those 2 brother-bags are really the way I would need my * Dream City Bag *

Version 2

More simple, there is only one bag in very light fabric stored in a pocket. You can have it in every bag you already have at home (your favourite, I'm sure) and it would help you anyway when you need more space!

Inside the bag there is a small intern bag, made for your personal data like beauty things, bubblegum, money, ...

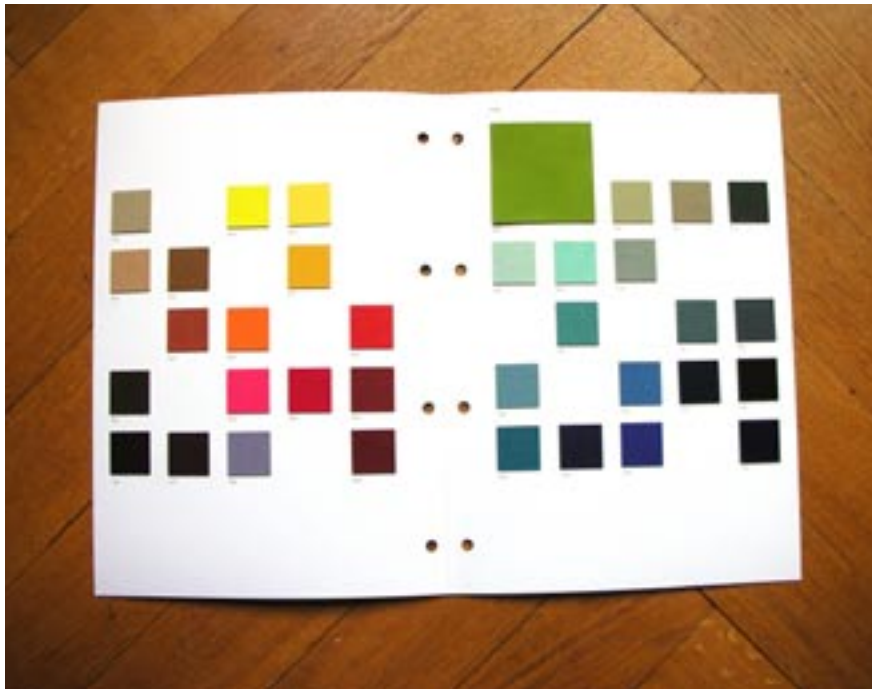

... pencil, keys, music player, everything small you need to find quickly !

**Inside this small pocket you also can find exactly the same shaped bag but on a differet material, very light and a bit bigger.
If you need to make your shoping or if you want to store your jacket during a concert (a huge jacket, like on this picture...) or while drinking in a pub, put everything in it, even your first bag !!!**

because of the two folded side, the bag can be filled up even with my huge white jacket from the last image, and if I wanted, even the cat could stay in.

the Loop colors by Kvadrat

the bag is unisex, colors has to be open like blue,

black, orange or grey violet

please let me know if you need more informations. I'm not sure I was so explicit, but time is over. Take care. Sibylle
